South Tangerang, Indonesia

Data Science graduates with hands-on experience across the full AI stack from building and maintaining production-grade ETL data pipelines to training machine learning models and developing LLM/RAG-powered applications. Passionate about translating emerging AI and data technologies into practical business solutions. Experienced in Python, SQL, LLM frameworks (LangChain), and cloud-adjacent data infrastructure (S3, MinIO, Airbyte, Prefect). Eager to bring analytical rigor and a collaborative mindset towards on demand industries.

Experiences

MTA - Tangerang Selatan, Indonesia

Mar 2026 - Present

AI Engineer

PT Meahulinta Teknologi Analitik (MTA) is a growing startup focusing on data and AI solutions for business users around the industries.

- Trained a Customer Churn Prediction model using PyCaret and SparkSQL applying LightGBM (LGBM) model with feature engineering technique achieving a recall score of 94% delivering a 3.95% lift in operational efficiency for the client.
- Lead data engineering on a Data Management Platform project, designed and maintained end-to-end ETL pipelines orchestrated with Prefect and ingested via Airbyte, processing data from S3/MinIO lakehouse (Lakekeeper).
- Applied Apache Spark and open-source transformation framework Seeknal for large-scale data transformations, governed metadata with DataHub.

PT. Ada Ide Indonesia - Bandung, Indonesia

Dec 2025 - Feb 2026

AI Engineer Intern

Ada Ide an on-demand digital solution based in Bandung. Established in 2018, Ada Ide provides any digital services such as Website Development, IT Consulting, System & Software Development, Network Solution, etc.

- Engineered an automated invoice processing and social-media post workflow using n8n and LLMs, reducing manual data-entry workload by 70%.
- Developed an end-to-end VLM-based OCR pipeline for ID card extraction using DeepSeek-OCR, PyTorch, and Transformers reinforced with image preprocessing and custom regex parser with contextual look-ahead logic for robust data extraction.
- Deployed the extraction REST API with FastAPI & Docker, integrated with PostgreSQL for real-time verification.

PT. United Tractors Tbk - Jakarta, Indonesia

Feb 2024 - Jun 2024

Data Science Intern

PT. United Tractors is the leading and the largest heavy equipment distributor in Indonesia under PT. Astra International Tbk.

- Worked directly with Data Engineer, Data Scientist, and Business Analyst team in analyzing features that influence oil and fuel efficiency on heavy equipment through feature engineering process creating ready-to-use dataset for dashboard automation.
- Aggregating, Preprocessing, Transforming and Creating Standardization of heavy machine equipment and operation data using Python Kedro contributing to noticeable improvements in team efficiency.
- Transforming ETL code of heavy machine performance data from Python to R.

Asia AI Institute - Musashino University, Japan

Nov 2023 - Jun 2025

Research Assistant

Asia AI Institute is a community-based department that focuses on Data Science and AI under the Department of Data Science of Musashino University.

- Curated a custom dataset of over 4,000 images for waste detection, applying augmentation techniques such as mixup to handle class imbalance.
- Fine-tuned YOLOv8n, YOLOv8x, YOLOv11 and DETR models for waste detection, achieving a mAP@50 of 33%.
- Built a web-based platform for food waste detection, seamlessly integrated with a waste management RAG chatbot, utilizing Python Streamlit, LangChain, and TensorFlow.

Education Level

Politeknik Elektronika Negeri Surabaya - Surabaya, Indonesia

Aug 2021 - Oct 2025

Bachelor of Applied Data Science, 3.79/4.00

- Appointed as the leader of Badminton Community of IT Student Association, Conducted orientation activities for over 150+ new members.

The Hague University of Applied Sciences - The Hague, Netherlands

Aug 2024 - Feb 2025

Exchange Student Coursework: AI, Quantum Computing, and Blockchain for Data Integrity, 8.60/10.00

- Engaged in formal coursework on Blockchain and Cryptocurrency, focusing on real-world applications and industry implementation.
- Engaged in non-academic enrichment activities such as seminars, club activities, and international related events.

Organizational Experience

Badminton Student Activity Unit - Surabaya

Aug 2023 - May 2024

Head of External Division

The Badminton Student Activity Unit is a non-academic Student Activity that focuses on developing Badminton Athletes on Campus and accommodating students who just love playing Badminton.

- Organized monthly sparring with Badminton Student Activity Units from 3 different campuses.
- Communicating and directing 30+ members of the Student Activity in weekly training.

Skills, Achievements & Other Experience

- **Achievements** ✅ (2024): IISMA 2024 Student Exchange Awardee at The Hague University of Applied Sciences, Netherland
- **Achievements** ✅ (2024): Top 10 Finalist Innovation Competition by UTalk Active
- **Certification** ✅ (2024): TOEIC English Certification Score : 870
- **Certification** ✅ (2024): Indonesian Professional Certification Authority (Data Scientist)
- **Certification** ✅ (2023): Dicoding | Machine Learning Beginner to Intermediate
- **Certification** ✅ (2023): Dicoding | Python Beginner to Intermediate
- **Soft Skills** (2023): Analytical Thinking, Problem Solving, Team Management, Adaptability, Fast Learning, Communication, Public Speaking.
- **Hard Skills** (2023): Python, Docker, n8n, TensorFlow, PyCaret, PyTorch, Scikit-Learn, Spark, YOLO, Transformer, LangChain, RAG, LLMs, SQL, MySQL, PostgreSQL, Looker Studio, Streamlit, R, Airbyte, Lakekeeper, MinIO, Prefect.
